Longopac® Stand
- Endlessly clever

easi recycling

A bag system for efficient and sustainable handling of waste products

The Longopac® system takes your waste management to a new level

HYGIENIC

- No contact with waste at any time.
- Spillage around the opening follows into the next bag.
- Easy cleaning.

EFFICIENT

- A new bag is always in place.
- Faster bag changes - under 30 sec.
- Less cleaning.
- Flexible changes. You decide when the bag is full, no matter the volume of waste.

SUSTAINABLE

- Up to 50 % recycled material in all cassettes (except Food and Pharma).
- 80 % lower CO_2 emissions compared to traditional waste bags.
- 100 % filling degree.
- Longopac® is manufactured in 3-layer polyethylene, which provides low raw material consumption in combination with high strength.
- Lower weight and compact packaging mean less storage and transport costs.

Longopac® is easy to handle

Seal and change bags in 30 seconds!

Step 1:
The bag cassette is sealed at one end with a cable tie. When the bag starts to fill or you simply want to change it, you pull the bag down to feed new material out of the cassette.

Step 2:
To seal the bag, use a cable tie at the top of the waste.

Step 3:
Attach another cable tie approx. 5cm above the first cable tie and cut the bag material between them.

STAND CLASSIC

Longopac® Classic
One system. Many possibilities.

The Classic family is divided into several groups: Classic, Classic Inox and Classic Food. Each is available in three sizes – Mini, Midi and Maxi.

Classic is a versatile waste handling system created for modern professional environments. It combines efficient waste management with flexible packaging possibilities. Simple to adapt. Easy to integrate.

From food production and HoReCa to healthcare, cleaning and office spaces, Classic fits naturally into different workflows and environments. Its strength lies in its flexibility. The right solution for the right space, without unnecessary complexity.

The new Classic Maxi takes the concept further. More capacity for environments where volumes are higher and efficiency matters. It brings the same clean design and flexible approach to larger-scale waste handling.

Classic is made to work across industries, spaces and changing needs. A considered solution for better waste handling.

Classic Mini, Midi, Maxi, Inox and Recycling

Classic Midi, Maxi and Recycling are equipped with a base plate and cassette holder in PP* plastic, but in all versions the legs are aluminium and the wheels are galvanized steel. Classic Mini is slightly different from Midi and Maxi as it is equipped with a base plate in ABS/PC** and a cassette holder in PP* plastic. The Classic Inox version has legs and nylon-covered wheels in stainless steel to withstand regular cleaning.

The Stand family also includes Classic Recycling, which is primarily intended for the handling of plastic, paper or other material of larger volumes that are then intended to be compressed for recycling. This stand is only available in the Maxi version and for this the Longopac® Ultra Lean cassette is advantageously used, which is available in standard or perforated design, which removes air during compression.

CLASSIC MINI
Item no: 31400 (Alu),
31430 (Inox)

CLASSIC MIDI
Item no: 30500 (Alu),
30510 (Inox)

CLASSIC MAXI
Item no: 40070 (Alu),
40110 (Inox)

CLASSIC MAXI RECYCLING
Item no: 30090

To prevent the recycling material from migrating out of the bag, there is a specially designed adaptor disk to place in the opening that prevents this.
Item no: 30170

Classic Food Mini, Midi, Maxi the food industry solution

Classic Food is intended for the food industry and therefore the base plate and cassette holder are designed in PP plastic with blue metal detectable material. The legs and wheels are created in stainless steel, which together provide a stand with a durable design that meets the hygiene requirements set in this industry.

CLASSIC MINI FOOD
Item no: 31436

CLASSIC MIDI FOOD
Item no: 30516

CLASSIC MAXI FOOD
Item no: 40116

*PP = Polypropylene, **ABS/PC = Acrylonitrile Butadiene Styrene / Polycarbonate

STAND CLASSIC

Dynamic stands - for demanding environments

The Dynamic stands are designed to withstand lots of stress and very tough environments which often require high hygiene standards and therefore must be regularly sanitized.

The stands are designed to give the user a more open work surface to facilitate bag change and cleaning. Dynamic are equipped with brakes on the front wheels, which are also larger than on traditional waste stands.

You choose which side of the cassette holder you want to mount the supplied cable tie holder and the pairs of scissors on.

Dynamic Pedal stands have the same characteristics as the regular Dynamic, but are also equipped with a pedal and lid. The lid has been equipped with a damper to give it a softer closing. When the pedal is pressed, the lid is raised to an 85 degree opening for easier handling of waste or packaging.

The lid on the Dynamic Pedal can also be set completely open at a 100 degree angle to facilitate a faster loading of a new cassette. All plastic parts are made out of a metal-detectable material and the stand is loaded with any of our Longopac® Mini, Midi or Maxi cassette.

DYNAMIC MIDI PEDAL
Item no: 34640 (FZB),
34630 (Inox)

DYNAMIC MINI
Item no: 34650 (FZB),

Item no: 34720 (FZB),
34730 (Inox)

Dynamic UBS - focus on hygiene and ease of use

DYNAMIC MIDI UBS
Item no: 34500
How to open it up.

Our stands in the Dynamic family fit perfectly into spaces that are demanding and place very high demands on cleanliness and hygiene. Our Dynamic UBS (Under Bench Solution) has been specially designed for these environments where there is also a limited space, such as restaurant kitchens, showrooms and catering.

Dynamic UBS has the same dimensions as the rectangular plastic containers that are common on the market, and which in many cases are already used under the counters at various café chains and restaurants.

Unlike the rectangular plastic containers, we have equipped the UBS stand with wheels to make it easier for the staff to roll it out when changing the bag. We have further simplified changing the bag by designing the side so it folds down with a simple grip of the hand, which then gives full access to the bag. The side folds up again with a click and the stand is rolled back into its place.

Dynamic UBS is made of powder-coated steel and is easily loaded with any of our Longopac® Midi cassette.

Dynamic Wire Base - the best solution for demanding cleaning requirements

The idea we had when we developed the Dynamic Wire Base was a product for our food segment that would withstand tougher cleaning agents.

In addition, you do not need to lay down the rack when it is drying, as the grid at the bottom enables drainage and faster drying. It can of course be used in all environments and segments where these benefits are necessary.

Like the other stands in the Dynamic series, they are designed to provide a freer work surface that facilitates two aspects; bag changes and cleaning. The Dynamic Wire Base is also equipped with larger front wheels than on traditional garbage stands and we have added brakes to them. You choose which side of the cassette holder to mount the supplied cable tie holder and scissors.

DYNAMIC MAXI WIRE BASE
Item no: 34715
Also available as MINI

Not enough space? Put it on the wall!

Our wall-hung models are designed to be mounted where space is limited and narrow. They are also a better choice if there is greater demand on floor hygiene than regular floor stands, as the placement on the wall facilitates cleaning around the stand. Our wall models are excellent as bathroom solutions.

Classic Wall

Classic Wall Mini and Wall Maxi have cassette holders made of polypropylene with an aluminium wall bracket. They are also available with lids.

CLASSIC WALL MINI
Item no: 31420

CLASSIC WALL MAXI
Item no: 30080

Dynamic Wall

Dynamic Wall Mini is made of white powder-coated steel, while Dynamic Wall Mini with lid and Wall Midi are made of silver-colored powder-coated steel.

MINI AND LID
Item no: 34330

DYNAMIC WALL MIDI
Item no: 34335

Sign system for easy sorting

To further improve garbage and waste management, Paxxo has designed a smart and flexible sign system for Classic and Dynamic stands. You mount the signs in an easy and smart way to increase the understanding of how the waste should be sorted.

The signs fit all Classic, Dynamic and Wall solutions, except Dynamic Wall Mini and are available as A4-Portrait and A5-Landscape, in Nordic or International versions. We deliver an editable PDF file for you to adapt the text to your needs and then easily print them on your laser printer.

Nordic color system for waste handling.

Accessories

Everything you need to make your Longopac® solution work even smarter.

Tools and fastening

CABLE TIE HOLDER CLASSIC
Standard - grey, Item no: 30470
Metal detectable - blue, Item no: 30476

Cable tie holder with integrated holder for scissors suitable for Mini, Midi and Maxi.

CABLE TIE HOLDER DYNAMIC
Standard - grey, Item no: 30420
Metal detectable - blue, Item no: 30426

The cable tie holder for the entire Dynamic series. (Holder only)

SCISSORS KIT FOR DYNAMIC INOX
Metal detectable - blue, Item no: 34609

Kit with metal detectable scissors, scissor holder and stainless steel wire.

SAFETY KNIFE - CUTTER KIT
Blue, Item no: 30440

Kit with cutter in metal detectable PP. Wire in stainless steel and cable ties in metal detectable PA.

Bag handling

RUBBER BAND
White, Item no: 3102

The rubber band can be used together with all Longopac® cassette holders. Effectively locks the cassette in place and prevents it from unravelling.

ADJUSTABLE PLATE FOR CLASSIC MINI
Grey, Item no: 31480

Reduces the consumption of bag material and the size of the bag. Primarily intended for use with heavy waste.

LID FOR CLASSIC MINI AND MAXI 3.0
Grey - Mini, Item no: 31140
Grey - Maxi, Item no: 30140

ADAPTER DISC FOR CLASSIC MAXI 3.0
Grey, Item no: 30170

Reduces the aperture for easier compression of e.g. recycled plastic.

Stands and mobility

FRAME FOR CLASSIC MINI
Grey, Item no: 33890

The frame holds the bag in place.

DYNAMIC ESD KIT WHEELS
Silver/black, Item no: 34616

Contains four castor wheels, two of them with brakes. Replaces the original wheels on stands used in ESD restricted areas.

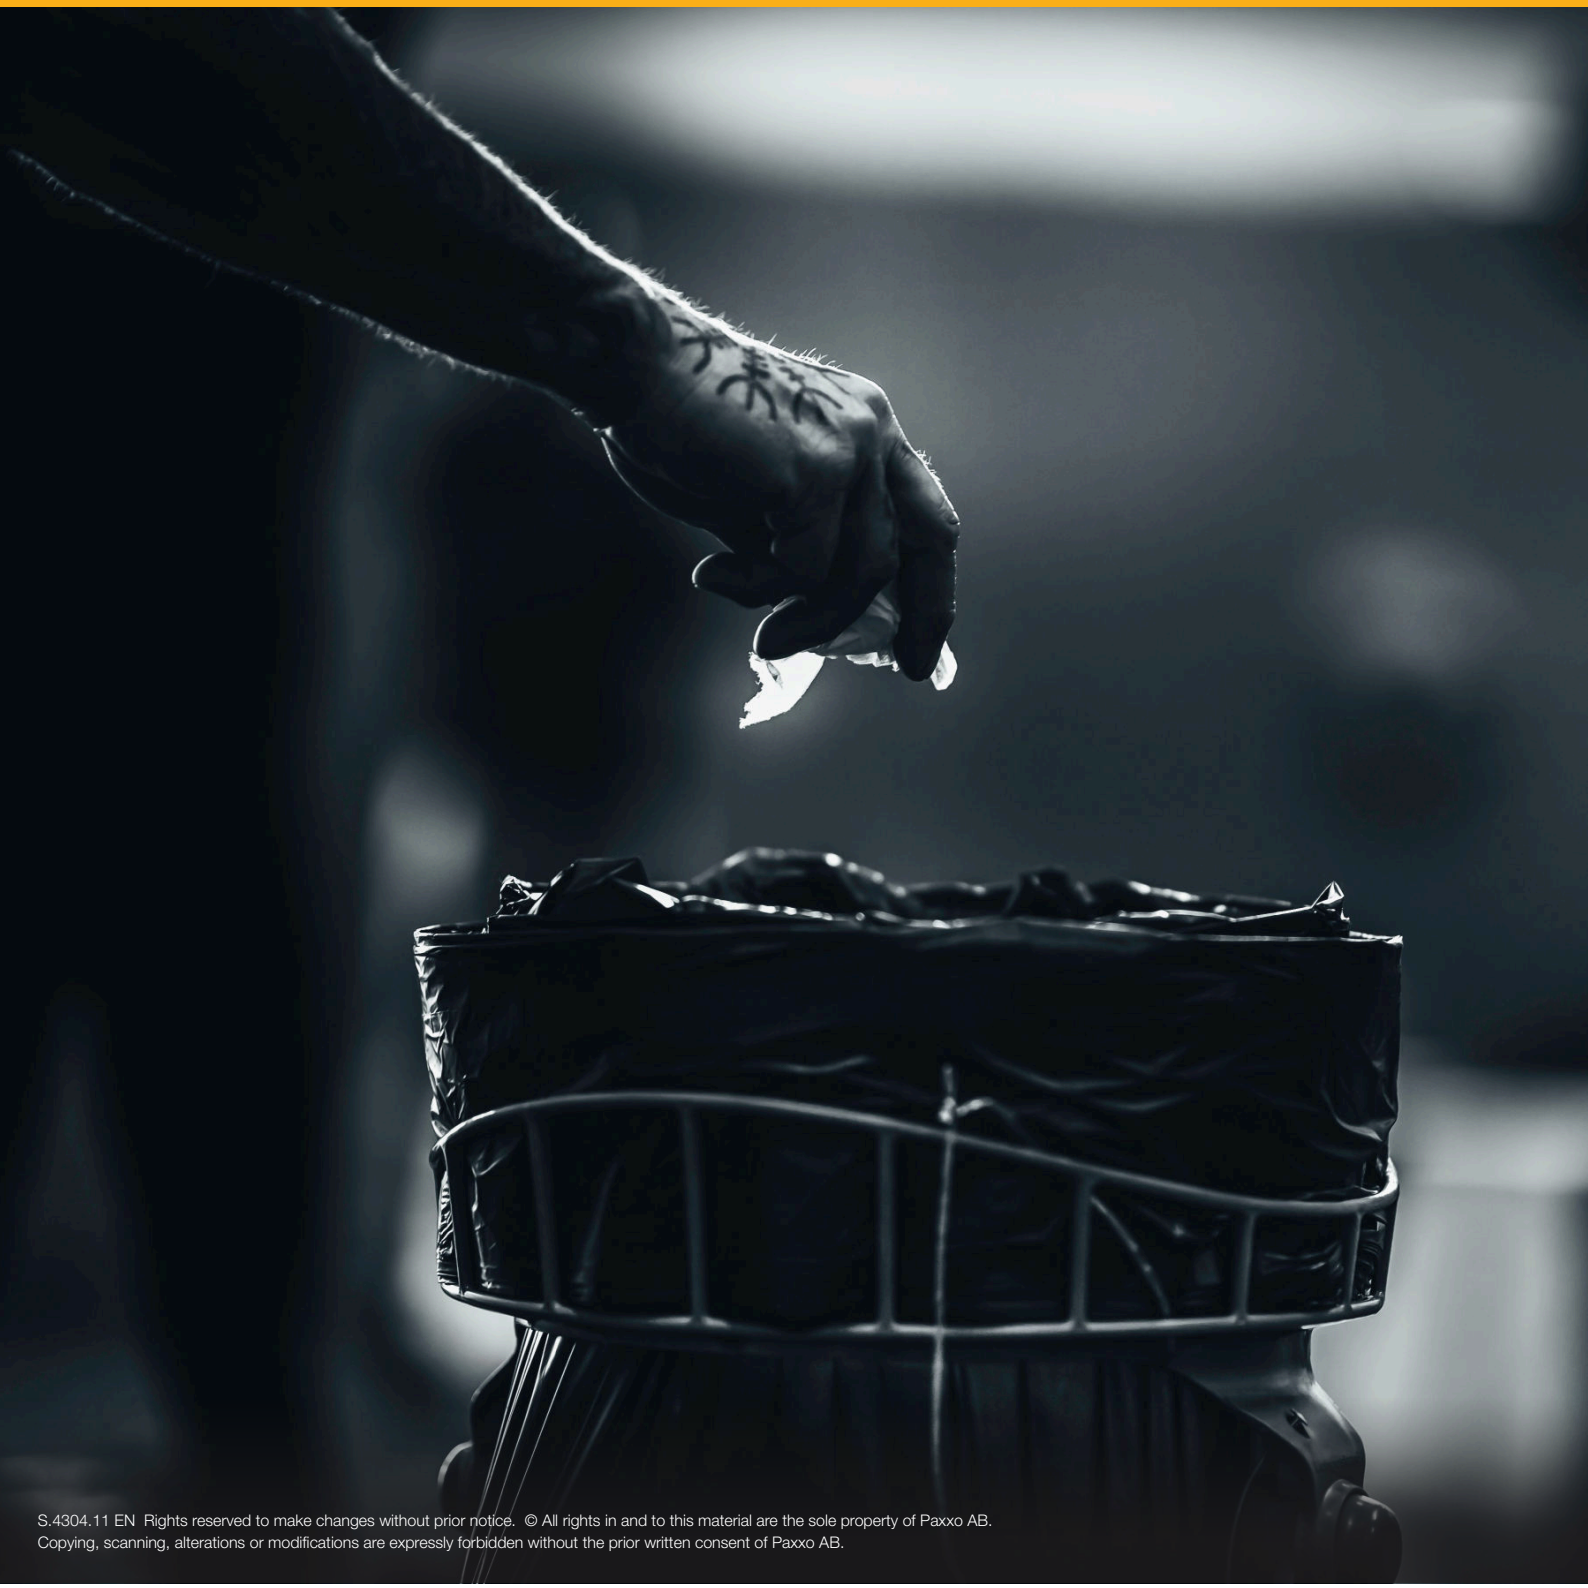

CONNECTOR FOR ALL CLASSIC
Grey, Item no: 33750

Connects two or more stand products simply and securely. It is also possible to connect Maxi with Mini.
